INDIA**

ULTRASOUND scan of the THYROID

This imaging technique uses high frequency sound waves to produce images. Ultrasound is the preferred imaging modality for evaluation of the thyroid.

American College of Radiology

TIRADS

(THYROID IMAGING REPORTING AND DATA SYSTEM)

Your ultrasound thyroid report will be issued based on the **ACR TIRADS**.

**ONE STOP SOLUTION
FOR ALL THYROID PROBLEMS**

ULTRASOUND GUIDED FINE NEEDLE

ASPIRATION CYTOLOGY (US-FNAC)

FNAC is done to look for cancer cells in a thyroid nodule. During this procedure, your doctor inserts a very thin needle in the nodule and removes a sample of cells. It helps to distinguish between benign and malignant thyroid nodules.

US-FNAC

An ultrasound guided FNAC is done to accurately target the suspicious thyroid nodule.

DEDICATED ONSITE PATHOLOGIST

We have dedicated onsite pathologists to check for the adequacy of the **US-FNAC** test.

**ONE STOP SOLUTION
FOR ALL THYROID PROBLEMS**

HOW IS IDEA

clinic different from others

Thyroid problems such as thyroid nodules, hypo & hyperthyroidism are becoming increasingly common in the general population. It is very important to correctly identify cancerous nodules and advise appropriate treatment. The patient has to schedule multiple visits with several centres for complete treatment and quality may be of concern. We have established a one stop thyroid clinic, dedicated to the management of thyroid disorders. It is run by specialist Endocrinologists, Endocrine Surgeon and dedicated pathologist in order to address these issues.

QUADRUPLE ASSESSMENT

- Consultation by a specialist
- Blood tests*
- High resolution ultrasound scan of the neck*
- Ultrasound guided fine needle aspiration cytology (US-FNAC)*

*If needed

IDEA One Stop Thyroid Clinic is the first dedicated thyroid clinic established in India.
